

LONG DISTANCE

26

HN254

Application:

- Steer or trailer wheel, suitable to use on good condition.
- Wider tread design, which can provide better anti-wearing character and good turning direction stability.
- Longer mileage and good retreadability.

27

HN369

Application:

- Use on traction wheel, suitable to use on good road condition.
- Wider and deeper tread design, which can provide better anti-wearing character and anti-irregular wear character.
- M+S pattern, with powerful grip ability and good traction character.

4

HN252

Application:

- Steering wheel and trailer wheel for long distance application.
- Suitable for high speed on good road surface application.
- With excellent anti-side-skid character, low rolling resistance, good driving stability.
- Low heat generating, low rolling resistance, good high-speed property.

2

HN267

Application:

- Steer wheel and trailer wheel, distance application.
- Suitable for high speed on good road surface application.
- With excellent anti-side-skid character, low noise.
- Low heat generating, excellent high speed driving character.

3

HN308+

Application:

- Steering wheel and trailer wheel for long distance application.
- Suitable for high speed on good road surface application.
- With excellent anti-side-skid character, low rolling resistance, good driving stability.
- Low heat generating, low rolling resistance, good high-speed property.

5

HN359

Application:

- Drive wheel long distance use
- Suitable for highway and good road condition.
- With good drainage character and anti-side-skid character.
- M+S pattern, with good traction character, good anti-wearing character.

HN806

Application:

- Trailer wheel, long distance.
- Suitable for highway and good road condition.
- With good drainage and anti-side-skid character.
- Low heat generating, low rolling resistance.

14

HN809

Application:

- Trailer wheel.
- Special designed pattern for super single trailer tyres.
- With good drainage and anti-side-skid character.
- Low rolling resistance, low noise.

13

HN826+

Application:

- Installed on trailer.
- Suitable to high-speed ride on expressway and high quality road surface.
- With good drain and side-skidding resistance property.
- Low heat generating and low roll resistance.

OFF ROAD

28

HN828+

Application:

- Trailer wheel, long distance use.
- Suitable for highway and good road condition.
- With good drainage and anti-side-skid character.
- With good anti-uneven wearing character.

6

HN09

Application:

- Drive wheel.
- Suitable for use on construction site road.
- Good traction character and passing through character.
- Good anti-crack character and good anti-puncture character.

7

HN10

Application:

- Installed on drive wheel or steering wheel.
- Suitable for low speed on bad road condition like mining area.
- With powerful grip ability and passing through character.
- Good self-cleaning character, anti-wear character and anti-puncture character.
