

REGIONAL USE

0

HN06

Application:

- Steer wheel and trailer wheel, regional use.
- Suitable for good road surface application.
- With excellent anti-skid character, low rolling resistance.
- Low heat generating, excellent high speed driving character.

HN07

Application:

- Installed on drive wheel for regional use.
- Suitable to transport on asphalt road or other bad road condition application.
- Tyres with pattern have powerful grip ability, excellent traction character.
- Good high-speed and anti-puncture character.

9

HN226

Application:

- Steer wheel for long distance and regional use, can also be used on drive wheel and trailer wheel.
- Suitable for highway and good quality road inside city.
- Strong carcass design provides long service life.
- Excellent anti-uneven wear character, wide and deep pattern design provides good turning stability.

10

HN366+

Application:

- Drive wheel regional use.
- Suitable for highway and good road condition.
- M+S pattern, with good traction character, good passing-through character.
- Excellent low rolling resistant and low noise.

24

HN207+

Application:

- Steer, Trailer wheel, regional use.
- Suitable for high and medium speed on good road surface application.
- With excellent anti-skid character and drainage character.
- With excellent loading capacity character, low rolling resistance, low noise character.

HN229

Application:

- Steer wheel and trailer wheel, regional use.
- Suitable for driving on good road surface application.
- With excellent anti-side-skid character and drainage character.
- With excellent anti-uneven wear character.

8

HN230+

Application:

- Steering, traction or trailer wheel for regional use.
- Suitable for driving on good road surface application.
- With excellent anti-side-skid character, low noise.
- Low roll resistance and good high-speed character.

HN233

Application:

- Steering wheel for regional use, can also be used on traction wheel.
- Suitable for driving on good road surface application.
- With excellent anti-side-skid character and excellent anti-uneven wear character.
- Low heat generating, low rolling resistance.

12

HN235

Application:

- Trailer wheel for regional use, can also be used on drive wheel and steer wheel.
- Suitable for driving on good road surface application.
- With excellent anti-side-skid character and good drainage character.
- Low noise and good high-speed property.

ON/OFF USE

HNS96

Application:

- Steer, drive wheel, on/off use.
- Suitable for transporting at low-speed on poor road such as, mining and forestry road.
- This pattern has good once mileage and anti-wear property.
- With anti-breach and anti-puncture character.

HN08

Application:

- Steering wheel, drive wheel and trailer wheel, on/off application.
- Suitable for mixed road surface and relatively poor road surface.
- With excellent crack and tear resistance character.
- Low-heat generating and good high speed driving character.

HN228

Application:

- Steer, Drive/Trailer wheel, on/off application.
- Suitable for relatively poor road surface.
- With excellent grip ability and traction character.
- Low heat generating, excellent loading capacity.
