

22

HN829

Application:

- Suitable for trailer.
- International use.
- Newly developed profile with extremely low rolling resistance.
- Excellent cost per kilometre.

15

HN257

Application:

- Steer and trailer wheel, regional use.
- Suitable for highway and good quality road use.
- With excellent anti-side-skid character, low rolling resistance, low noise.
- With excellent anti-uneven wear character.

HN259

Application:

- Steer, drive, trailer wheel, on/off use.
- Suitable for mixed road surface and relatively poor road surface.
- With excellent crack and tear resistance character.
- With excellent anti-uneven wear character.

16

HN309

Application:

- Drive wheel regional use.
- Suitable for highway and good quality road condition.
- M+S pattern, with good grip character and traction character.
- Good anti-wearing character, long mileage.

HN324

Application:

- Drive wheel regional use.
- Suitable for highway and good road condition.
- M+S pattern, with good traction character.
- Good anti-wearing character, anti-uneven wear character and long mileage.

17

HN355

Application:

- Drive wheel regional use.
- Suitable for highway and good road condition.
- M+S pattern, with good traction character.
- Good anti-wearing character, long mileage.

23

HN357

Application:

- Drive wheel regional use.
- M+S pattern, with good traction character.
- Good anti-wearing character.
- Low heat generating character and good high speed driving character.

19

HN306

Application:

- Drive wheel regional use.
- Suitable for highway and good quality road inside city.
- With excellent grip ability and traction character.
- Long mileage and anti-wearing character, good high speed driving character.

18

HN805

Application:

- Trailer wheel regional use.
- Suitable for highway and good road condition.
- With good drainage and anti-uneven wearing character.
- Good driving stability.

20

HN253

Application:

- Steer wheel, trailer wheel, on/off use.
- Suitable for mixed road surface and relatively poor road surface.
- With excellent crack and tear resistance character.
- Low heat generating character and good high speed driving character.

25

HN266

Application:

- Steer wheel on/off application.
- Suitable for relatively poor road surface.
- M+S pattern, with good traction character.
- Long mileage and anti-puncture character.

21

HN353

Application:

- Drive wheel on/off application.
- Suitable for highway and mixed road, road use.
- M+S pattern, with good traction character.
- Good anti-wearing character, long mileage and low heat generating.
